

Track Power feeders are Blue & White (shown as Blue & Gray on diagram). There are five feeders numbered TJ1 through TJ5. Blue (-) is connected to the Inside Rail; White (+) to the Outside Rail. Turnout Power feeders are Red & Black. There are three turnouts numbered T1 through T3 that are controlled by turnout controllers TC1 through TC3.

Dashed Lines indicate where modules join together.

Purple Ovals indicate where power feeders cross between modules and require connectors (refer to the text for more details).

F - indicates that "Female" connectors are used on that side of the joint.

M - indicates that "Male" connectors are used on the opposite side of the joint.
